YOUR GLOBAL SUGAR PARTNER

Tate & Lyle Sugars is part of ASR Group. With more than **150 years** of combined experience, ASR Group refines more cane sugar than any other company in the world. We are a leading **supporter of Fairtrade**. We source from over 40 countries and refine **6 million tons** of raw sugar every year, at 11 refineries, on 3 continents.

ABOUT US

- Refinery
- Non-refinery
- Sales Office
- Third Party Operation

Spreading sweet successes around the world: Through Fairtrade we are proud to have made a positive contribution to small-scale cane sugar farmers in developing countries, since 2008. By choosing to buy Tate & Lyle Fairtrade cane sugar, you enable us to improve the quality of lives across whole communities.

FAIRTRADE

Why We Offer Fairtrade

Fairtrade is an internationally recognised system that encourages small-scale farmers to become organised communities, improving their environmental and ethical practices. When farmers have the opportunity to sell in this way they receive better terms of trade and greater financial support through the Fairtrade Premium. It therefore makes good, long-term business sense for Tate & Lyle Sugars to support Fairtrade and the people who farm sugar cane.

Under the Fairtrade system, farmers must demonstrate good financial practice and decide democratically how to spend the Fairtrade Premium, an incredibly exciting process empowering farmers to have a direct say in how to improve their livelihoods.

To date the Fairtrade Premium paid by Tate & Lyle Sugars has funded some life-changing projects across 14 different groups in 4 countries.

Our Philosophy

When working with our partners, we believe in making a positive difference, conducting business with integrity and minimising negative impacts.

When buying any product made with Tate & Lyle branded Fairtrade cane sugar or some products such as chocolate or ice cream containing cane sugar and bearing the Fairtrade mark, you are enabling Tate & Lyle

Sugars to continue as one of the largest Fairtrade Premium contributors globally.

Tate and Lyle Sugars recognise the importance consumers place on Fairtrade as a powerful way to change the way trade works through everyday shopping. With your continued support we are proud to continue to work with Fairtrade, making a difference to farmers worldwide.

As a global food company, ASR Group recognises the importance of sustainability. At our core, our **enterprise relies on a healthy ecosystem** and that awareness steers the decisions we make. Beginning with the sugar cane planted on our farms to the products delivered to our customers, our business depends on reliable supplies of water and productive soils.

SUSTAINABLE BUSINESS

Sustainability Targets

We are seriously committed to running a sustainable business. To date we have achieved some impressive results:

- Our robust water-reduction program has seen a decrease in our usage across the entire production process
- Our waste-reduction program in FY2013 yielded an impressive 9% decrease of total waste disposed from packaging, general plant, office and food waste streams
- Our goal to reduce our refineries' natural gas and fuel oil consumption per CWT by 10%, as part of our five-year (2007-2012) program was surpassed at end FY2012 by an average of 12%
- Our initial goal of using 25% renewable energy by 2020 has already been exceeded by 20%, thanks largely to ASR Group's biomass facilities
- Our ASR Group Code of Ethics and Business Conduct upholds high ethical values in every aspect of employees jobs.
- We have also set some ambitious and long-term sustainability targets to ensure our accountability and dedication to best practice. Our pledge is to:
 - Generate zero waste to landfill by 2020
 - Reduce total energy use by 30% by 2030
- Increase the use of renewable energy by 25% by 2020.
- Reduce water usage per product by 40% by 2020
- Decrease our GHG Emissions per product by 15% by 2020
- Implement our sustainability philosophy as part of ASR Group culture – through business strategy and the way employees manage their work.

Corporate Responsibility

ASR Group's sustainability program is complemented by a commitment to our thousands of employees, their safety and wellbeing. We also strive to make a positive impact on the communities where they work and live. This means ensuring a safe workplace and offering services and initiatives to promote wellness reflecting our core values:

- Doing Business with Integrity
- Promoting a Discrimination-Free and Harassment-Free Workplace
- Ensuring Workplace Health and Safety
- Providing Ongoing Training and Leadership
- Investing in Corporate Philanthropy
- Developing and promoting Community programs.

For more information please refer to ASR Group's Sustainability Report.

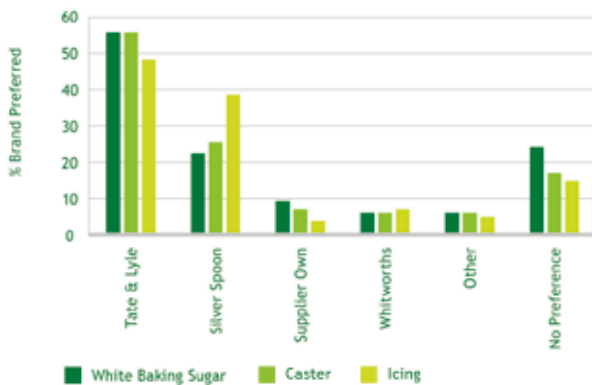

Cane Sugar

Our business is primarily built around sugar cane, which accounts for 80% of the 160 million tonnes of sugar produced globally

The Benefits of Cane Sugar

Cane has great versatility - multiple harvests can be reaped from a single planting and harvesting can take place at any time of the year, making production cost efficient. Cane sugar has great advantages compared with its nearest equivalent, Beet, in terms of flavour, growing methods, product variation and ease of use in cooking.

Chefs' Preference

Characterised by its fruity aroma, sweet aftertaste and handling qualities, Tate & Lyle branded cane sugar is preferred by 68% of Pastry Chefs compared with Beet¹ competitors. It is considered easier to mix and has better setting properties. When tested alongside Beet, in products such as hard candies, there was a discernible difference - cane produced a clearer, more caramel tasting, smoother textured candy².

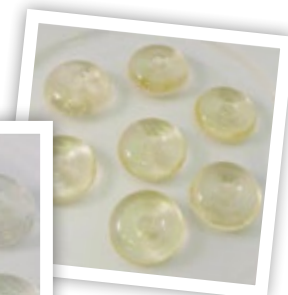

Product Variation

Cane sugar's versatility means it can offer significantly larger product variation compared to Beet. The molasses derived from cane refining, unlike Beet, adds sweetness and enhances the flavour of brown and golden sugars. White sugar, brown sugar, syrups and treacles are all by-products of sugar cane enabling Tate & Lyle Sugars to offer an unrivalled product range.

Golden Soft Cane Sugar

Colour: 2,900 IU
Crystals: 0.27 - 0.42mm
Soft syrupy fine grained

Tate & Lyle's Soft Brown sugars are moist and rich in colour, texture and flavour helping to create flavoursome puddings, pastries and cakes, or add sweetness to sauces and glazes. With its fine, quick-dissolving crystals and medium-bodied buttery flavour, Light Soft Brown is delicious in caramels, sauces and fruity preserves. The toasted malty taste of Dark Soft Brown melts easily and its hint of savoury and moist texture makes it a useful addition to pies, puddings and stews.

Most of our sugars are available in Fairtrade & non-Fairtrade versions.

Stevia Brown Sugar
Colour: 3,500 IU Max
Crystals: 0.90 - 1.20mm

Fruit Sugar
Colour: 20 IU Max
Crystals: 0.20 - 0.60mm

Tate & Lyle's White Sugar with Stevia is made with natural extract from the stevia plant. Being twice as sweet as standard sugar, you only have to add half as much to cut calories by 50%; providing a perfect lower calorie alternative for those looking for a lighter option.

Tate & Lyle's Brown Sugar with Stevia is a combination of sweetly spiced Demerara Sugar and Stevia plant extract. Enhanced by the molasses flavour of Demerara, it is ideal in baked goods due to its stability at high temperatures and provides a distinct crunchy texture and rich taste.

Tate & Lyle's Fruit Sugar (aka fructose) is sweeter than standard sugars and has a low Glycaemic Index of 23.

Most of our sugars are available in Fairtrade & non-Fairtrade versions.

Dark Muscovado

Colour: 2 - 4 Z (Hunter)
Crystals: 0.23 - 0.33mm
Soft syrupy fine grained

Ideal ingredient for brownies, cookies and muffins as well as excellent for chocolate desserts, fruitcakes and marinades

Tate & Lyle's Muscovado sugars have a rich molasses content, giving them a full, deep flavour, produced in a variety of strengths. Light Muscovado has a creamy aromatic flavour, a warm honey colour and a moist crumbly texture - making it an ideal ingredient for brownies, cookies and muffins. Dark Muscovado is rich and strong in flavour with a soft, fudgy consistency, excellent for chocolate desserts, fruitcakes and marinades.

Most of our sugars are available in Fairtrade & non-Fairtrade versions.

Amarelo Sugar

Amarelo Sugar
Colour: 2,500 IU Max
Soft syrupy fine grained

Amarelo Sugar is moist, quick dissolving and golden yellow in appearance, derived from the molasses extract

Sidul Amarelo Sugar is moist, quick dissolving and golden yellow in appearance. Its colour and flavour are derived from the molasses extracted as part of the cane sugar refining process, resulting in a moistened texture that prolongs the life of baked products, such as cakes, scones and muffins. Easily blended, it also achieves excellent results by adding sweetness to chocolate products and cocktails.

Golden

Caster and Granulated

Golden Granulated Sugar
 Colour: 800 Typical IU
 Crystals: 0.55 - 0.75mm

Golden Caster Sugar
 Colour: 800 Typical IU
 Crystals: 0.35 - 0.50mm

A more flavoursome version of the classic white sugars and just as versatile, predominantly used in baked goods, such as light cakes or cookies

Tate & Lyle's Golden Granulated and Caster sugars are a more flavoursome version of the classic white sugars and just as versatile. Predominantly used in baked goods, such as light cakes or cookies where only slight additions to colour and flavour are required. Both sugars have a subtle gold hue with a gentle aroma and light caramel taste, providing a smooth flavour. Distinguishable only by texture, Granulated is coarser, while Caster has a finer, free-flowing crystalline form that is easier to dissolve.

Most of our sugars are available in Fairtrade & non-Fairtrade versions.

Specialist Sugars

Jam, Preserving and Pectin

Jam Sugar
 Colour: 45 IU Max
 Crystals: 0.45 - 0.60mm
 Contains pectin & citric acid

Preserving Sugar
 Colour: 45 IU Max
 Crystals: 1.5 - 2.2mm

Tate & Lyle Jam Sugar acts as a natural preservative when making jams and jellies. Added pectin offers the perfect setting agent to ensure products achieve the correct consistency when using fruits such as strawberries and cherries.

Tate & Lyle Preserving Sugar has larger, slower dissolving crystals than most sugars, reducing the need to continuously stir, preventing burning and therefore producing less froth during the cooking process. With no added pectin it is ideal for use with ingredients containing high pectin level, such as citrus fruits and apples.

Tate & Lyle Pectin Sachets are ideal when used as a setting agent for home-made soft fruit jams and jellies.

Most of our sugars are available in Fairtrade & non-Fairtrade versions.

Sweeteners

A great low-calorie alternative to sugar, primarily for use in beverage sweetening

Tate & Lyle Sugars' range of sweeteners offer a great low-calorie alternative to sugar, primarily for use in beverage sweetening. There are two branded solutions in a variety of sweetener blends. The Zucro brand is a great alternative to the market leaders, offering the same taste experience at a very competitive price. Zucro is available in both Sucralose (yellow) and Aspartame (Red) to suit the different tastes and practices of local markets. Zing Stevia is the new solution for natural-seekers who want a lower calorie sweetener, without the bitter aftertaste sometimes found with other Stevia sweeteners.

Lyle's Syrups

Lyle's Golden Syrups have proved to be a delicious time-honoured topping and baking companion

Lyle's Golden Syrups have a unique place in kitchens worldwide. With the original flavour unchanged since 1883, it has proved a delicious and time-honoured addition to many desserts and sweet treats. Alongside this popular kitchen staple, our range has expanded to include maple and honey flavours, offering competitively priced, great tasting alternatives for consumers and the foodservice industry.

Lyle's Black Treacles

Intense bittersweet flavour adds richness while the beautiful black sheen provides depth of colour to a multitude of bakes and dishes

Lyle's Black Treacles have a distinctive dark flavour and is a stalwart flavouring for cakes, puddings, gingerbread, toffee, savoury glazes and marinades. Made from cane molasses gathered during the late stages of the sugar refining process, the intense bittersweet flavour adds richness while the beautiful black sheen provides depth of colour to a multitude of bakes and dishes.

Beverage Syrups

A sweet, thick and delicious complement to a variety of hot and cold drinks

Tate & Lyle Beverage Syrups are a new addition to the company's vast sweetening range and are made from pure cane sugar (apart from sugar free variants), providing a sweet, thick and delicious complement to a variety of hot and cold drinks. Consumers state that they love the taste of the Tate & Lyle range, citing its thick, rich and wonderfully indulgent flavour. As a certified Fairtrade product, stocking Tate & Lyle syrups means increasing opportunities for over 20,000 small-scale farmers in developing countries.
